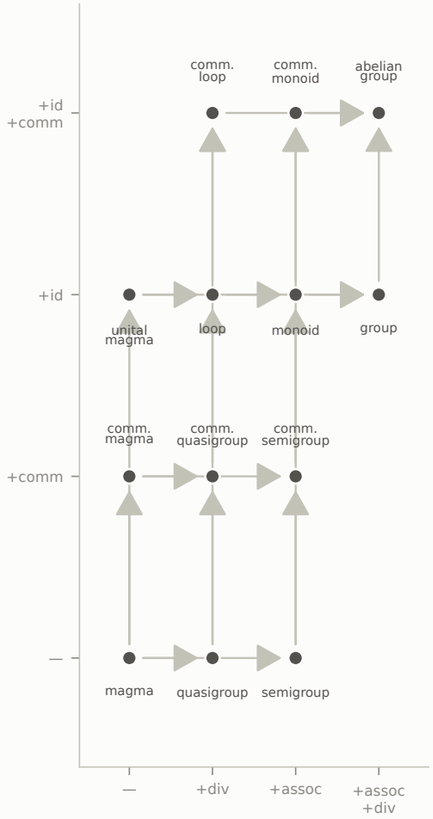
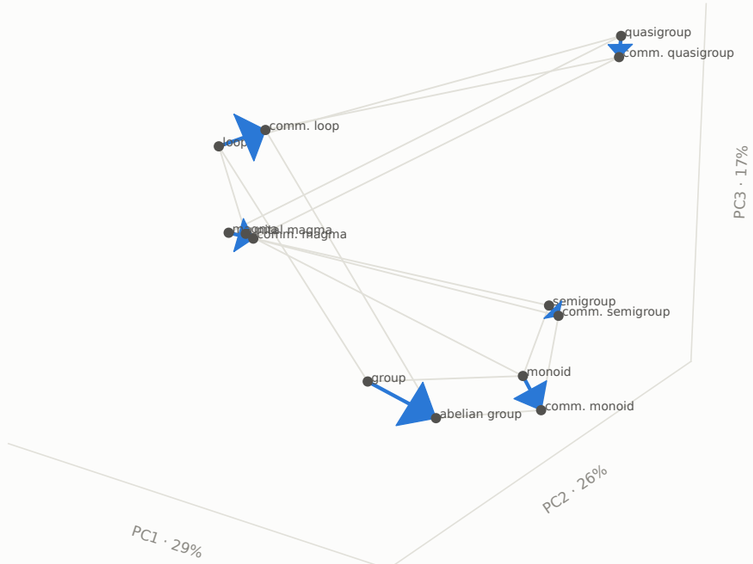
1 · Structures are sets of axioms



2 · Adding an axiom is an arrow + commutativity in Qwen3.5-0.8B (top-3 PCs)



3 · Line the arrows up model

consistency 0.57

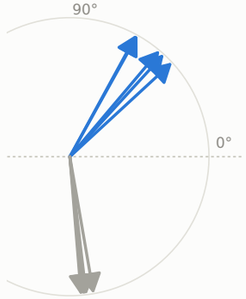
random-init twin

consistency 0.02

4 · Measure in the full space: angle of each arrow to the others' mean

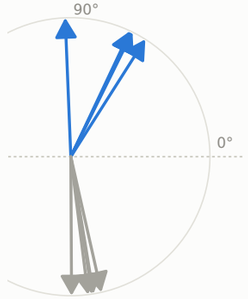
model above the dashed line (blue), twin below (grey); 0° = same direction, 90° = unrelated

+ associativity



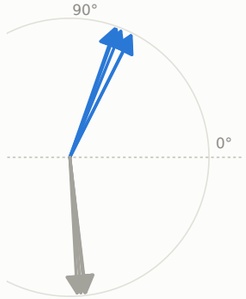
consistency 0.47 (p = 0.003)
twin 0.06

+ identity



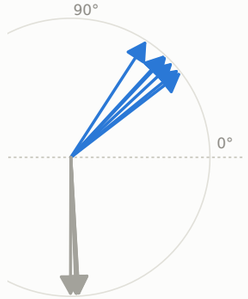
consistency 0.22 (p = 0.057)
twin 0.07

+ divisibility (inverses)



consistency 0.26 (p = 0.043)
twin 0.05

+ commutativity



consistency 0.57 (p < 0.001)
twin 0.02
