A · Axioms act as directions

Qwen3.5-2B ★

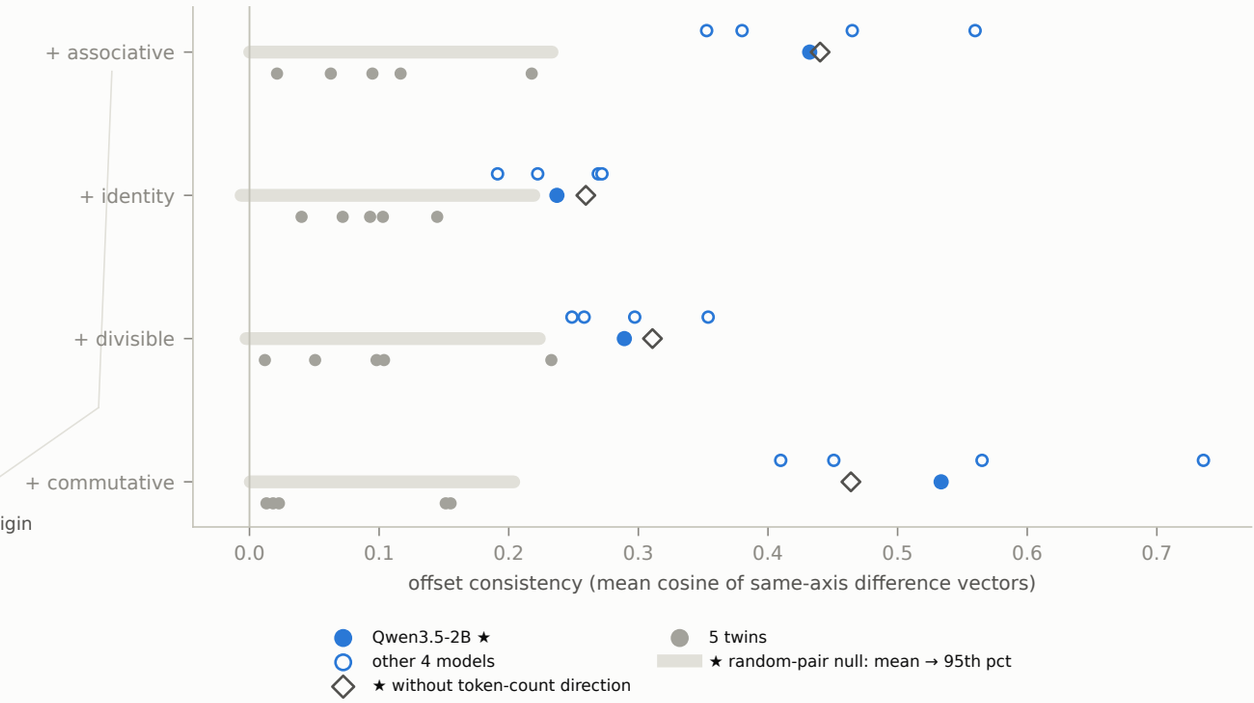

'+ commutativity' arrows from one origin
consistency 0.53

its random-init twin

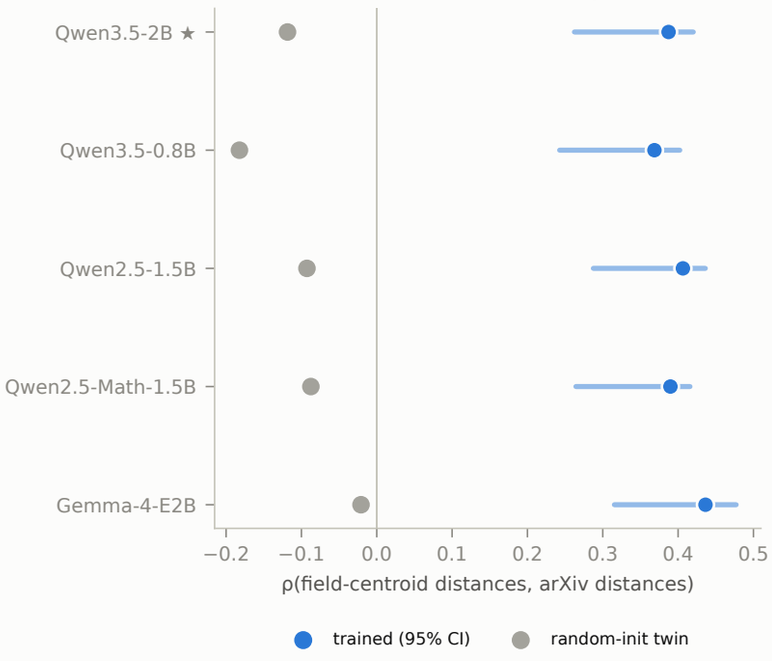

'+ commutativity' arrows from one origin
consistency 0.01

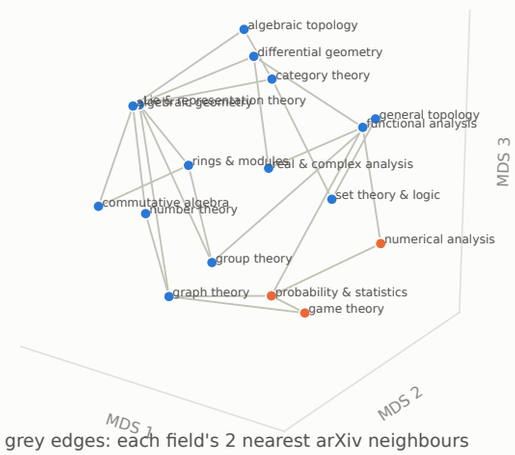

B · All four axioms, all five models: parallel arrows, unlike the twins

C · Fields form a map in every model

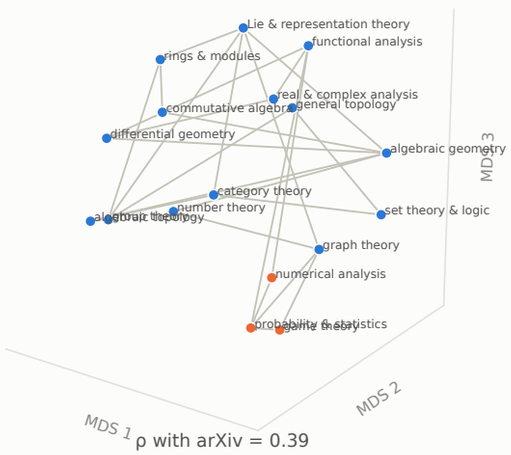

D · arXiv cross-listing (ground truth)

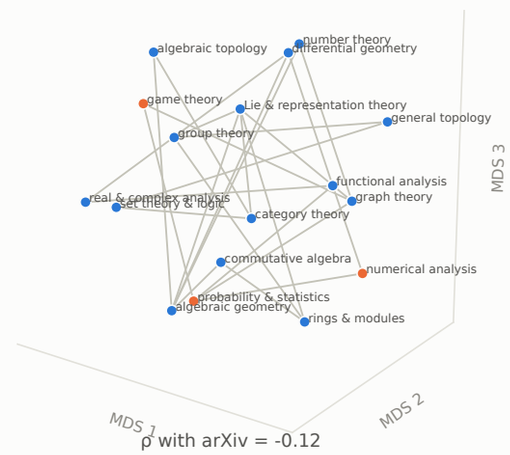

grey edges: each field's 2 nearest arXiv neighbours

Qwen3.5-2B ★: related fields sit together

ρ with arXiv = 0.39

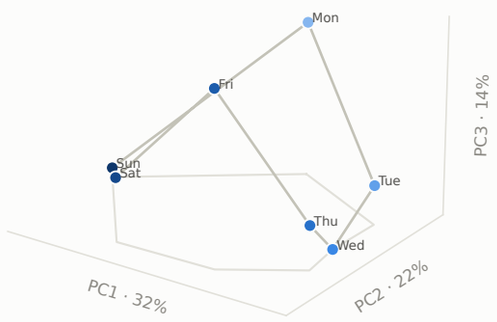

Its random-init twin: no map

ρ with arXiv = -0.12

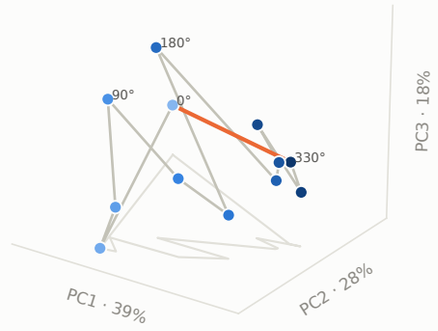

pure field
applied field

E · Days: a circle

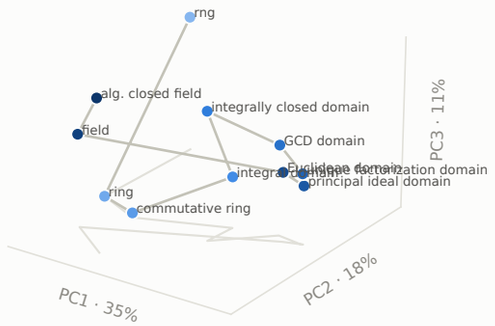

cycle score 1.00 (twin 0.14)

Angles: not a circle

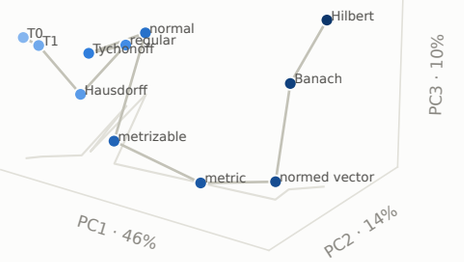

d(0°, 330°) = 2.11 × neighbour step (twin 0.80)

Ring chain: an ordered path

Robinson 0.52 (twin 0.30)

Space chain: an ordered path

Robinson 0.65 (twin 0.33)
