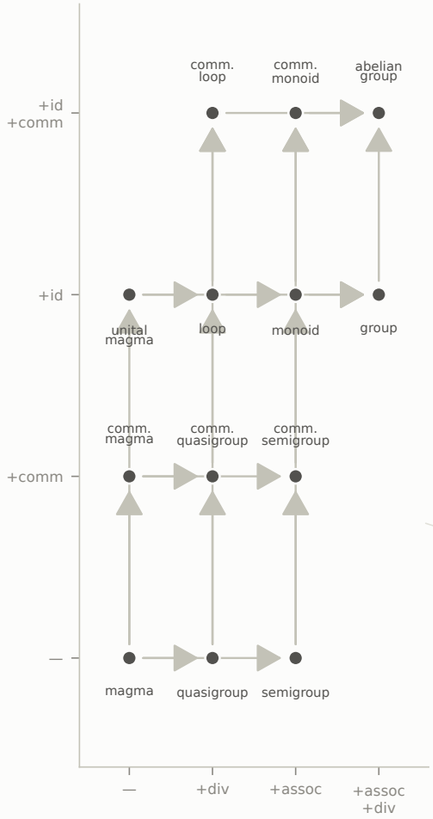
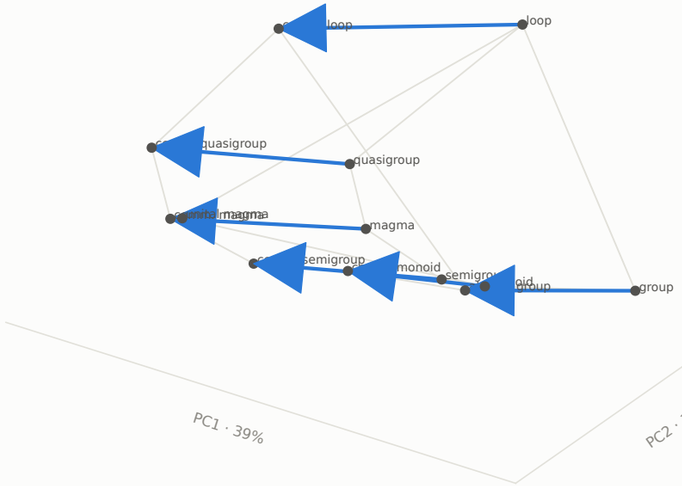
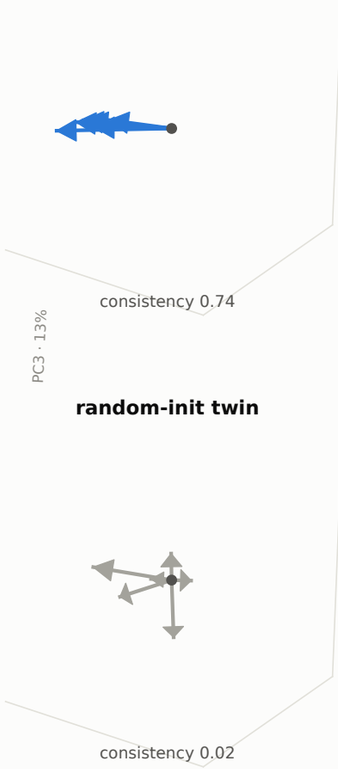
1 · Structures are sets of axioms



2 · Adding an axiom is an arrow + commutativity in Gemma-4-E2B (top-3 PCs)



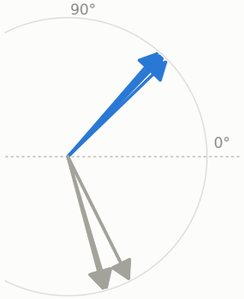
3 · Line the arrows up



4 · Measure in the full space: angle of each arrow to the others' mean

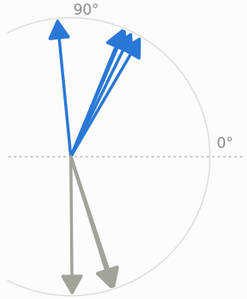
model above the dashed line (blue), twin below (grey); 0° = same direction, 90° = unrelated

+ associativity



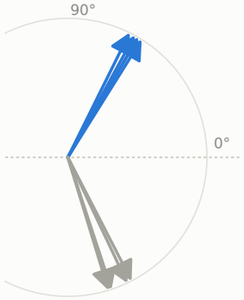
consistency 0.56 (p = 0.002)
twin 0.22

+ identity



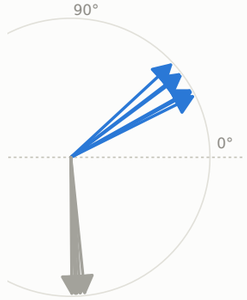
consistency 0.19 (p = 0.090)
twin 0.14

+ divisibility (inverses)



consistency 0.35 (p = 0.023)
twin 0.23

+ commutativity



consistency 0.74 (p < 0.001)
twin 0.02
