ρ(field-centroid distances, arXiv distances)
trained (95% CI)
random-init twin
B · arXiv cross-listing (ground truth)
set theory & logic
general topology
category theory
game theory
algebraic topology
group theory
numerical analysis
rings & modules
Lie & representation theory
functional analysis
commutative algebra
graph theory
probability & statistics
algebraic geometry
real & complex analysis
number theory
differential geometry
grey edges: each field's 2 nearest arXiv neighbours
Qwen3.5-2B ★: related fields sit together
